Automatically Read Proprietary Video Files
- Simple drag/drop functionality.
- Automatically identify codec/format.
- Play/frame step forwards and backwards.

Batch Process to Standard File Formats
- Quickly transcode files to standard formats.
- Leverate multi-threading to process up to 10 times faster.
- Options include: Uncompressed, Lossless H264, WMV, and many more.

Mark and Export Important Frames
- Expedite case workflow by exporting important frames in seconds.
- Industry-standard method for highest quality images.
- Avoid inaccurate and clunky proprietary DVR players.

Examples of Basic Workflow Improvements:
- ❑ **Resize**
  - Accurately identify native pixel dimensions.
  - Control the method to be used for interpolation.
  - See preview of output before processing.
- ❑ **Concatenate**
  - Combine hundreds of short clips into one ouput.
  - Control the settings for transcoding.
  - Expedite video review.

Examples of Advanced Workflow Improvements:
- ❑ **Clarify Images**
  - Streamlined enhancements for video images.
  - Extract I-frames from video segments in seconds.
  - Seamlessly average images and adjust levels.

Examples of Advanced Workflow Improvements:
- ❑ **Stabilize**
  - Automatically stabilize shaky cell phone or body-worn videos.
  - Easily track suspect through still output.
- ❑ **Sync Videos**
  - Sync cameras from multiple sources.
  - Create side-by-side output from multiple angles.
  - Observe events from all cameras simultaneously.

Analysis Tools:
- ❑ **Macroblock Analysis**
  - Identify "real" data in compressed videos.
  - Remove repeated data.
  - Observe events as they were originally recorded.
  - Interpret images from the originally recorded data.

Analysis Tools:
- ❑ **Metadata Tools**
  - Quickly identify hash, GOP, refresh rates, location, etc.
  - Validate using multiple tools.
  - Generate Excel report of information about every frame.
- ❑ **Narrative Report**
  - Generate interactive PDF reports of all observations.
  - All images/videos are self-contained within the PDF file.
  - Hotlinked areas in the PDF allow reader to view images/videos.
